Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-3 and 8-10, the allowability in combination with the other claimed features is because nowhere in the prior art is there a multi-layer ceramic capacitive device having the pluralities of first and second electrode plates respectively interleaved in alternating planes to form a capacitive stack. Regarding claims 5, the allowability in combination with the other claimed features is because nowhere in the prior art is there a multi-layer ceramic capacitive device having the plurality of capacitive devices mounted to the circuit board in a diamond arrangement such that the first terminal is in electrical connection with the four plurality of contacts, one each at the corners of the device and wherein the second terminal is in electrical connection with one of the plurality of contacts of an opposing polarity. Regarding claims 6-7 and 11 the allowability in combination with the other claimed features is because nowhere in the prior art is there a multi-layer ceramic capacitive device having a plurality of second terminals corresponding to alternating ones of the plurality of contacts in each of the plurality of rows such that all of the second terminals have the same polarity which opposes the polarity of the first terminals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
